

PowerSchool Parent Account Creation

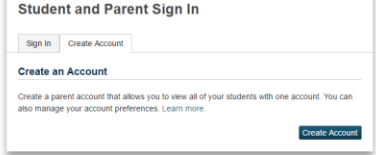

The PowerSchool Parent Portal allows you to view your student(s) records. You can have multiple students added to your account, even if they attend different schools. You will need to create and manage your own username and password, which you will not have to share with other individuals (e.g. step-parents, guardians), who may have access to the student(s) records. Below are the steps to create a new account.

1) In a web browser, go to the PowerSchool Parent Portal at <https://hsd.powerschool.com/public/>

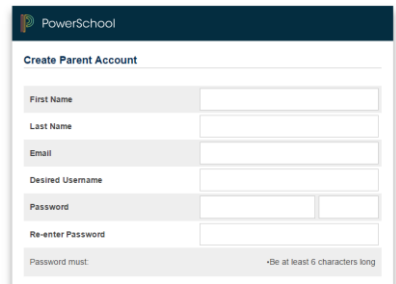

2) Click on the tab "Create Account" as shown below.

3) Click on the "Create Account" button.

4) Fill out the parent information.

5) Link student(s) to your new account. If you do not have the Access ID or Access Password, please see your student(s) school in person. They will not give the information over the phone or via email. Enter your relationship to the student. More than one student can be linked to your account.

6) Click on the "Enter" button at the bottom of the page.
